

Rotary 5030 District Calendar Help

The District Calendar has the following features:

1. The current month and year is displayed by default.
2. The current day has a blue border.
3. Days on which events are scheduled appear in red. If there are no days displayed in red, it means that no events are scheduled for that month.
4. When you place the mouse over a date where an event is scheduled, an event summary appears as a tooltip.
5. When you click a date where an event is scheduled, a full event detail pop-up is displayed.
6. To change the month or year you are viewing, click the month links at the bottom of the calendar. You can change to calendar by 1 month with each click.
